2019 Population Projections for Eurobodalla help us understand the future size of the population and composition of households in the Shire.

The 2019 Population Projections indicate that the population of Eurobodalla is estimated to decrease by 2,250 people between 2016 and 2041, from 37,900 to 35,650. The inflow of people around retirement age into Eurobodalla is offsetting the loss of population due to natural change.

The working age population (aged 15-64) is estimated to decrease by 21,200 in 2016 to 17,400 in 2041 – a change of 3,800.

The number of children aged 14 and under is estimated to change by 1,300 children, from 5,650 in 2016 to 4,350 in 2041.

The number of people aged 65 and over is estimated to increase from 11,100 in 2016 to 13,900 by 2041 - a change of 2,800.

Supporting communities in Eurobodalla

The NSW, Federal and local governments are delivering infrastructure and capital works that may change future population patterns and growth beyond what is shown in the projections. For example:

- The $18m Mackay Park indoor aquatic centre build is delivering a major activity facility to the Eurobodalla region
- Enhancing connectivity and transport links in Eurobodalla's main air hub with a $4.6m Moruya Airport upgrade
- Boosting health services in Eurobodalla with the $11.8m Moruya Hospital rehabilitation facility build
- Improving safety and connectivity in Eurobodalla with the replacement of Clyde River and Batemans Bay bridges

What are the NSW Population Projections?

The NSW Population Projections estimate the future NSW population based on assumptions for fertility, life expectancy and migration. They represent possible demographic futures based on the best assessment of how the NSW population may change over time, including population size, age profile and residential location. These projections are based on assumptions known at the time of publication. These projections are a tool used by the Government in the planning of services and infrastructure such as schools, hospitals, transport and community services.

Future decisions, such as infrastructure investments and land use plans, will change future population patterns including growth and distribution. These projections do not change the vision set out in Regional Plans or affect local plans and strategies such as the Local Strategic Planning Statements and Local Housing Strategies.
