2019 Population Projections for Federation help us understand the future size of the population and composition of households in the Region.

The 2019 Population Projections indicate that the population of Federation is estimated to decrease by 2,150 people between 2016 and 2041, from 12,450 to 10,300. Natural change and people moving out of the area to Albury and across the Victorian border will drive population change in Federation.

The working age population (aged 15-64) is estimated to decrease by 6,950 in 2016 to 5,200 in 2041 – a change of 1,750.

The number of children aged 14 and under is estimated to change by 650 children, from 2,200 in 2016 to 1,550 in 2041.

The number of people aged 65 and over is estimated to increase from 3,300 in 2016 to 3,550 by 2041 - a change of 250.

Supporting communities in Federation

The NSW, Federal and local governments are delivering infrastructure and capital works that may change future population patterns and growth beyond what is shown in the projections. For example:

- The $3.58m Corowa Swimming Pool build will deliver a major health and activity facility to the area
- The $1.2m Howlong Hall build will deliver a multi purpose community facility
- Investing in community amenity including $450k for the Oaklands Recreation Reserve upgrade
- Federation Way Upgrade north of the Riverina Highway to improve commuter journeys

What are the NSW Population Projections?

The NSW Population Projections estimate the future NSW population based on assumptions for fertility, life expectancy and migration. They represent possible demographic futures based on the best assessment of how the NSW population may change over time, including population size, age profile and residential location. These projections are based on assumptions known at the time of publication. These projections are a tool used by the Government in the planning of services and infrastructure such as schools, hospitals, transport and community services.

Future decisions, such as infrastructure investments and land use plans, will change future population patterns including growth and distribution. These projections do not change the vision set out in Regional Plans or affect local plans and strategies such as the Local Strategic Planning Statements and Local Housing Strategies.
Information is rounded to the nearest 50, which can introduce discrepancies in totals and differences.
