Broughton St properties in Campbelltown
Response given to Macarthur Advertiser

182 and 186 Broughton St, Campbelltown, are derelict properties owned by the department. Locals are interested in knowing what's happening with them?

Department of Planning and Infrastructure response:

These properties were originally acquired for the purposes of a regional arterial road and still have a road widening zoning at the front. We understand Council is yet to finalise plans and decide if the road widening is still needed. The most recent advice is the properties and zoning are still required.

The properties are earmarked for demolition as their condition is such that it is not economical to repair them.
