Compliance officers inspect mines in the Greater Sydney region

The Department of Planning and Environment Compliance Officers inspected infrastructure and industry projects within the Greater Sydney region in November 2015 to ensure that they were meeting the conditions of their approval.

The Department has doubled the number of compliance officers in the field across NSW to monitor and enforce the conditions placed on State significant development such as mining.

“Our Compliance Officers conduct spot checks without warning, regular inspections and audits as well as work with companies and communities to ensure that companies are sticking to the rules,” a spokesperson for the Department said.

The Department can issue the highest on-the-spot fines in the country for breaches of conditions.

Companies can also be prosecuted in court for breaching conditions, with the most severe breaches attracting fines of up to $5 million.

Infrastructure and other projects inspected were:

- 225 George St, Grosvenor Tower (City of Sydney)
- Sydney CBD and South East Light Rail Project (City of Sydney, Leichhardt Municipal and Randwick City)
- Royal Northshore Hospital (Willoughby)
- Epping to Thornleigh Third Track (ETTT) (Hornsby Shire)
- Sydney Olympic Park 100 Bennelong Parkway (Auburn City)

Industry projects inspected were:

- St Marys Chemical Waste Facility (Fairfield City)
- Elf Mushrooms Farm and Substrate Plant (Penrith City).

The Department gave a presentation to the NSW Roads and Maritime Services at their annual environment forum on 30 November 2015.

“RMS is the applicant for various major infrastructure projects across the state, the spokesperson said.

“The forum provided an opportunity for the Department to promote its strengthened compliance, monitoring and complaints management processes.”
