Car-park and fuelling station approved at Barangaroo

A minor modification to a basement carpark at Barangaroo South has been approved by the Department of Planning and Environment.

The modification will allow the following changes to be made to the design of the already approved carpark including:

- A diesel fuel filling point at the entry to the Hickson Road off-ramp
- Electronic roller doors
- An additional lift lobby and two temporary lobbies for bicycles
- Storage areas and bathrooms.

The proposal was put on exhibition in March this year and received no community submissions and four submissions from agencies including City of Sydney Council.

No objections were raised by relevant Government agencies in their submissions and a change was made by the proponent to address an issue around the refuelling station raised by Transport for NSW.
