## **Addendum – Transitional Arrangement and Mapping Changes**

Section 79C of the *Environmental Planning and Assessment Act 1979* requires the consent authority to consider the provisions of this Explanation of Intended Effect when determining a development application (DA).

This Explanation of Intended Effect is amended on 19 May 2017 as follows:

1. A consent authority is not required to apply the provisions of the Explanation of Intended Effect to a DA lodged before Monday 22 May 2017.
2. The proposed Land Zoning map, Residential Density Ranges map, Minimum Lot Sizes map and minimum lot size controls for Box Hill precinct have been updated to incorporate the following amendments to *State Environmental Planning Policy (Sydney Region Growth Centres) 2006*:
  - Amendments to Marsden Park Industrial Precinct 2016
  - Amendments to Box Hill and Box Hill Industrial Precincts 2016

Refer to the Explanation of Intended Effect for current mapping information.

## Introduction

*Amendments to State Environmental Planning Policy (Sydney Region Growth Centres) 2006 (Growth Centres SEPP)* are proposed to implement actions from the North West Priority Growth Area Land Use and Infrastructure Implementation Plan (the Implementation Plan).

The proposed amendments to the Growth Centres SEPP will:

- make the Land Use and Infrastructure Implementation Plan the “structure plan” for the North West Growth Centre (now referred to as the North West Priority Growth Area);
- insert requirements for rezoning proposals to include a Development Control Plan and arrangements for the delivery of infrastructure;
- set minimum and maximum densities for all residential areas that have been rezoned under the Growth Centres SEPP;
- set minimum subdivision lot sizes in all residential areas that have been rezoned under the Growth Centres SEPP, and minimum lot sizes for some residential land uses consistent with the standard instrument local environmental plan; and
- consolidate six existing precinct plans in the Blacktown local government area into a single Blacktown Growth Centres Precinct Plan.

## Background

Action 2.4.1 of *A Plan for Growing Sydney* commits the Government to deliver greenfield housing supply in the North West and South West Priority Growth Areas (previously the North West and South Growth Centres) by updating the structure plans for the North West and South West Growth Centres, continuing to rezone land to maintain supply, and coordinating the delivery of infrastructure to support growth. A Land Use and Infrastructure Implementation Plan has been prepared for the North West Priority Growth Area and will, if approved by the Minister for Planning, replace the current North West Structure Plan 2006. The Implementation Plan sets out delivery actions and a long term vision for the North West Priority Growth Area, and identifies amendments to the Growth Centres SEPP to improve the delivery of new homes, jobs and infrastructure.

## Transfer of controls to Councils

The Land Use and Infrastructure Implementation Plan will provide clear strategic direction for the North West Priority Growth Area, enabling detailed planning and development controls for individual precincts to be handed back to local Councils. The proposed amendments will:

- consolidate six precinct plans that apply in Blacktown into a single plan; and
- make the development controls more consistent with the Standard Instrument Local Environmental Plan used by Councils to control development in their areas.

The proposed amendments will mean that precinct plans can be more easily removed from the Growth Centres SEPP and included in Council's local planning controls. The transfer of development controls into local planning instruments will give Councils more direct control and responsibility for ongoing implementation, and clarify the role of the Growth Centres SEPP in setting strategic outcomes for the Priority Growth Area.

## Residential Density Controls

Most residential areas have a minimum residential density control under the SEPP that, at the time, was established to ensure development met dwelling targets established for the precinct to ensure the efficient use of land and the funding of local and state infrastructure. Over the last 2-3 years, the housing market has changed considerably and Councils are now receiving development applications for permissible uses that far exceed the minimum residential densities in the Growth Centres SEPP. For example, in the North Kellyville Precinct, the minimum residential density for R1 zoned land is 12.5 dwellings per hectare and The Hills Council is assessing development proposals that exceed 100 dwellings per hectare. A number of these proposed developments have been approved as they do not contravene development controls, but the density of development means that the infrastructure planned to support the population will not be sufficient.

The density controls outlined in this document below will be established to apply to all residential land that has been rezoned under the Growth Centres SEPP. The Department has committed to work with local councils, Infrastructure NSW, Roads and Maritime Services and State Emergency Service to review planning controls for land within the Hawkesbury Nepean Floodplain which includes land below the Probable Maximum Flood (PMF). The Department will examine land uses below the PMF carefully, in consultation with key stakeholders and make recommendations about how land can be best utilised while ensuring that any risks are appropriately mitigated.

The proposed density ranges have been discussed and agreed in principle with the councils.

## **Minimum Lot Size Controls**

The Housing Diversity Package that was gazetted in August 2014 implemented changes to the way in which minimum lot sizes are controlled in the Growth Centres. The minimum lot size maps were not used to map a minimum subdivision lot size for most residential areas. Minimum lot sizes are currently set for different types of residential development in clauses in the precinct plans. Minimum lot sizes differ depending on the minimum residential density applying to the land. This has resulted in a complex system of minimum lot sizes within the Growth Centres SEPP, and feedback from councils indicates that the controls are difficult to implement when assessing development applications.

The proposed amendments will simplify the minimum lot size control and improve consistency with controls in the Council Local Environmental Plans by using the minimum lot size map to control subdivision lot sizes. The proposed changes are dealt with in more detail below.

## **Vineyard Precinct**

The Department is currently preparing a draft Precinct Plan for Stage 1 of the Vineyard Precinct. The controls being proposed as part of the Vineyard proposal include density ranges will be consistent with the ranges proposed in this Explanation of Intended Effect. The draft Vineyard proposal is generally consistent with the changes outlined in this proposal, however, a future housekeeping amendment will be required to ensure that minimum lot sizes are applied consistently across the growth area. Specifically, new minimum lot size maps will be prepared for the Precinct to ensure consistency with the rest of the growth area.

# Proposed SEPP Amendments

## Part 1 - Preliminary

Part 1 sets out the aims of the SEPP, important definitions and the land to which the SEPP applies. It is proposed that the Land Use and Infrastructure Implementation Plan will act as the structure plan for the North West Priority Growth Area. The definition of “growth centre structure plan” in clause 3(1) will be amended to include reference to the North West Priority Growth Area Land Use and Infrastructure Implementation Plan.

Specifically, the definition of “growth centre structure plan” in Clause 3(1) will be amended to:

- delete part (a) of the existing definition; and
- insert reference to the North West Priority Growth Area Land Use and Infrastructure Implementation Plan.

## Requirements for the Rezoning of Land

A new clause will be added to the Growth Centres SEPP that identifies requirements that must be satisfied prior to consent being granted for any development that:

- requires adoption of a development control plan, including a master plan for the area being rezoned. The Growth Centres SEPP will identify the requirements that must be fulfilled by a development control plan; and
- demonstrates that infrastructure will be delivered to service the development within appropriate timeframes.

## Amendments to Residential Density Controls

The residential density map will be amended to apply both minimum and maximum residential density controls for residential zoned land. The specific ranges to be applied to the different precinct plans are addressed in the tables below.

In addition, there are a number of areas across the North West Priority Growth Area where the residential density map does not show a minimum residential density. These areas will have a density range applied to them as addressed in more detail below.

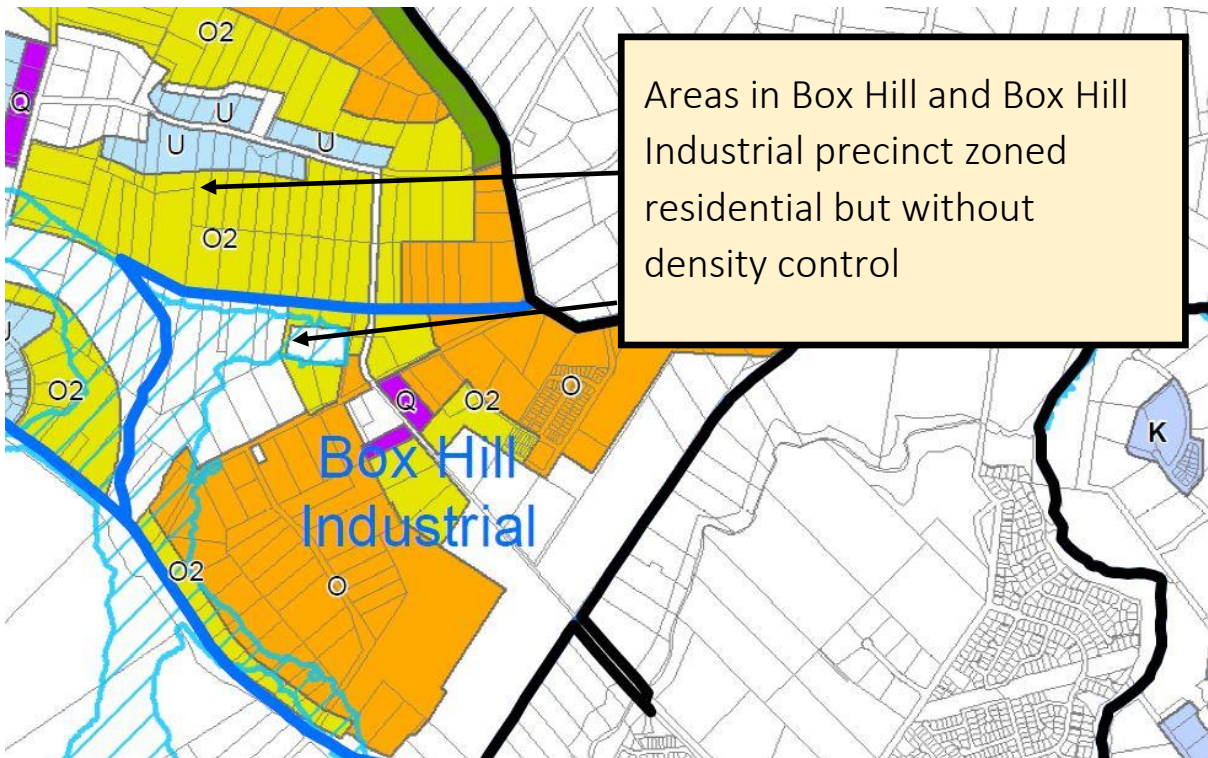

Figure 1 Areas in Box Hill and Box Hill Industrial Precinct zoned residential but without density control

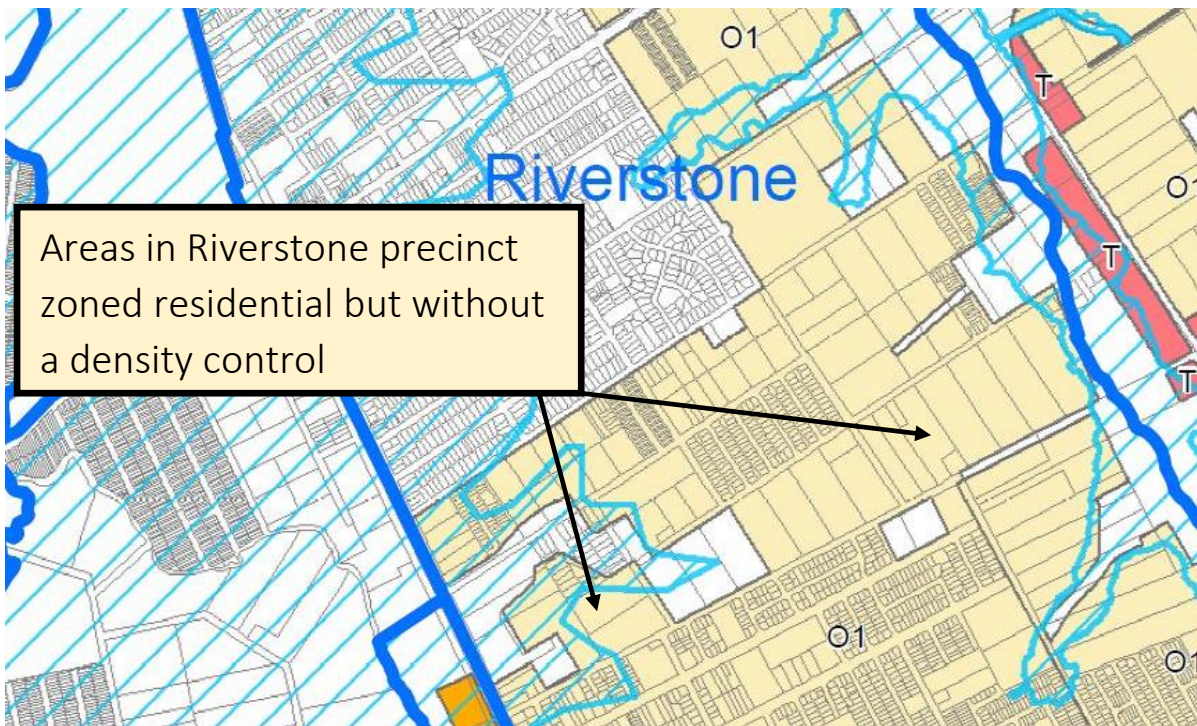

Figure 2 Areas in Riverstone Precinct zoned residential but without density control

## North Kellyville

The following density bands are proposed:

<b>Zone</b>	<b>Existing minimum density (dw/ha)</b>	<b>Proposed minimum density (dw/ha)</b>	<b>Proposed maximum density (dw/ha)</b>
R1	12.5	15	35
R2	10	10	15
R3	20	20	100

Refer to Appendix 1 for the draft residential density map.

## Box Hill and Box Hill Industrial

The following density bands are proposed in the Box Hill and Box Hill Industrial Precincts:

<b>Zone</b>	<b>Existing minimum density (dw/ha)</b>	<b>Proposed minimum density (dw/ha)</b>	<b>Proposed maximum density (dw/ha)</b>
R1	-	20	80
R2	5	-	-
This applies to a defined area along Old Pitt Town Road. Density is controlled by the 2000m:minimum lot size requirement therefore, the minimum density requirement will be removed.			
R2	15	15	20
R3	18	15	30
R4	20	20	80
This range would be applied in the R4 zoned land around the neighbourhood centre. This proposed density range reflects the lower height and floor space ratio controls in this area.			
R4	30	30	100

In addition to the application of density bands in the Box Hill and Box Hill Industrial Precincts, there are two areas of residential zoned land that do not have an associated residential density control. These anomalies will be corrected in this amendment and the areas will have the relevant density band applied ie. for R2 Low Density Residential zoned land, a density band of 15-20 dw/ha and for R3 Medium Density Residential zoned land, a density band of 15-30 dw/ha is proposed.

Refer to Figure 1 and Appendix 1 for the draft residential density map.

## Blacktown Precincts

The following density bands are proposed in all rezoned Precincts in the Blacktown local government area:

<b>Zone</b>	<b>Existing minimum density (dw/ha)</b>	<b>Proposed minimum density (dw/ha)</b>	<b>Proposed maximum density (dw/ha)</b>
R2	11	No change	No change
Area of land surrounding the heritage homestead, Clydesdale. Existing density requirements will remain unchanged.			
R2	15	15	25
For all other low density residential zoned land above the PMF			
R3	25,30	25	35
For all other medium density residential zoned land above the PMF			
R3	45	55	100

In addition to the application of density bands in all rezoned precincts in the Blacktown local government area, an area in the Riverstone Precinct that does not currently have a minimum residential density will have a density band applied to it. This land lies partly within the transmission line easement. The land is zoned R2 Low Density Residential and the same density band that applies to all R2 Low Density Residential zoned land above the Probable Maximum Flood line will be applied ie. 15-25 dw/ha.

Refer to Figure 2 and Appendix 1 for the draft residential density map.

## Amendments to Minimum Lot Size

The minimum lot size map will be amended to include minimum subdivision lot sizes for all residential areas. The clause that sets out minimum lot sizes for different types of residential development will be amended to have the same format as the standard instrument local environmental plans. This will result in

there being one minimum lot size for each type of residential development in each zone. The minimum lot sizes will no longer be related to the residential density controls. The proposed changes for the each precinct are set out below.

## North Kellyville

The minimum subdivision lot size plotted on the Minimum Lot Size Map on land in the North Kellyville Precinct will be:

- 300m<sup>2</sup> for the R1 General Residential and R3 Medium Density Residential zones; and
- 360m<sup>2</sup> for the R2 Low Density Residential zone.

Refer to Appendix 2 for the draft minimum lot size map.

An exception to the minimum subdivision lot sizes will be provided for semi-detached dwellings to allow subdivision to 300m<sup>2</sup> in the R2 Low Density Residential zone and 150m<sup>2</sup> in the R3 Medium Density Residential zone.

The minimum lot sizes set out in Clause 4.1AB for certain residential development will be as follows:

<b>Type of development</b>	<b>Zone</b>	<b>Minimum Lot Size</b>
Dual occupancy	R1	600m <sup>2</sup>
	R2	600m <sup>2</sup>
	R2	500m <sup>2</sup>
Attached dwelling	R1	1500m <sup>2</sup>
	R3	375m <sup>2</sup>
Multi dwelling housing	R1	1500m <sup>2</sup>
	R3	375m <sup>2</sup>
Manor Home	R3	600m <sup>2</sup>
Residential Flat Buildings	R1	4000m <sup>2</sup>
	R3	2000m <sup>2</sup>

## Box Hill and Box Hill Industrial

The minimum subdivision lot size plotted on the map will be 300m<sup>2</sup> in the R1 General Residential, R2 Low Density, R3 Medium Density and R4 High Density Residential zones. Refer to Appendix 2 for the proposed minimum lot size map.

An exception to the minimum subdivision lot sizes will be provided for semi-detached dwellings to allow subdivision to 200m<sup>2</sup> in the R2 Low Density Residential zone, 150m<sup>2</sup> in the R3 Medium Density Residential zone and 125m<sup>2</sup> in the R4 High Density Residential zone.

The minimum lot sizes set out in Clause 4.1A for certain residential development will be as follows:

<b>Type of development</b>	<b>Zone</b>	<b>Minimum Lot Size</b>
Dual occupancy	R1, R2, R3	500m <sup>2</sup>
	R4	300m <sup>2</sup>
Attached dwelling	R1, R2, R3	1500m <sup>2</sup>
	R4	375m <sup>2</sup>
Multi dwelling housing	R1, R2, R3	1500m <sup>2</sup>
	R4	375m <sup>2</sup>
Manor Home	R1, R4	600m <sup>2</sup>
Residential Flat Buildings	R1, R4	600m <sup>2</sup>
	R4	1000m <sup>2</sup>

## Blacktown Precincts

The minimum lot size for all rezoned precincts in the Blacktown local government area will be managed in the same way as the existing six precinct plans are being consolidated into a single plan, as addressed below. Refer to Appendix 2 for the draft minimum lot size map.

The minimum subdivision lot size on the map will be 300m<sup>2</sup> in the R2 Low Density Residential and R3 Medium Density Residential zones. The only exception to this is a small area of R2 Low Density Residential zoned land in the Marsden Park Precinct which has a minimum lot size of 600m<sup>2</sup> that will remain to preserve the integrity of an adjacent heritage item.

An exception to the minimum subdivision lot sizes will be provided for semi-detached dwellings to allow subdivision to 200m<sup>2</sup> in the R2 Low Density Residential zone and 125m<sup>2</sup> in the R3 Medium Density Residential zone.

The minimum lot sizes set out in Clause 4.1AB for certain residential development will be as follows:

<b>Type of development</b>	<b>Zone</b>	<b>Minimum Lot Size</b>
Dual occupancy	R2	600m <sup>2</sup>
	R3	400m <sup>2</sup>
Attached dwelling	R2	1500m <sup>2</sup>
	R3	375m <sup>2</sup>
Multi dwelling housing	R2	1500m <sup>2</sup>
Manor Home	R2	600m <sup>2</sup>
	R3	600m <sup>2</sup>
Residential Flat Buildings	R3	1500m <sup>2</sup>

## **Blacktown Local Government Area**

There are currently 13 appendices that set out specific planning controls for precincts in the North West and South West Priority Growth Areas. Six of these precinct plans are for precincts in the Blacktown local government area (LGA):

- Appendix 3 Riverstone West Precinct Plan;
- Appendix 4 Alex Avenue and Riverstone Precinct Plan 2010;
- Appendix 5 Marsden Park Industrial Precinct Plan;
- Appendix 6 Area 20 Precinct Plan;
- Appendix 7 Schofields Precinct Plan; and
- Appendix 12 Blacktown Growth Centres Precinct Plan.

These six precinct plans are proposed to be consolidated into one single precinct plan based on the Blacktown Growth Centres Precinct Plan (Appendix 12). Section 1.4 addresses the specific clauses that will be included in the Blacktown Growth Centres Precinct Plan. Controls that apply to the Colebee Precinct under the Blacktown LEP are not proposed to change.

## **The Precinct Plan**

### **Preliminary**

#### **Name of the Precinct Plan**

The Precinct Plan will be called the Blacktown Growth Centres Precinct Plan 2015.

#### **Aims of the Precinct Plan**

The aims of the Precinct Plan, being a consolidation of the aims in the existing six precinct plans, are to:

- a) Rezone land to allow for development to occur in the manner envisaged by the growth centre structure plans, and the indicative layouts for the Blacktown Precincts;
- b) Make development controls for land in the Blacktown Precincts within the North West Priority Growth Area that will ensure the creation of quality environments and good design outcomes;
- c) Protect and enhance riparian corridors and areas of significant native vegetation by establishing development controls that prevent the clearing of existing native vegetation within the Precincts;
- d) Protect and enhance areas of local heritage significance by establishing development controls in order to maintain and respect the relationships between heritage sites and uses of adjacent sites;
- e) Provide for recreational opportunities within the Precincts;
- f) Provide for innovative development in the Precincts that encourage employment and economic growth;
- g) Provide for the sustainable development of the Precincts;
- h) Promote housing choice and affordability by accommodating a wide range of residential dwelling types that cater for housing diversity;
- i) Promote pedestrian and vehicle connectivity with adjoining Precincts and localities and within the Precincts;
- j) Provide transport infrastructure to meet the needs of the community; and
- k) Rezone land to allow for retail and commercial uses to meet the needs of future residents of the Blacktown Precincts and surrounding areas.

#### **Land to which the Precinct Plan Applies**

The land to which the Blacktown Growth Centres Precinct Plan applies will be shown on the Land Application Map and includes land in Riverstone West Precinct, Alex Avenue Precinct, Riverstone Precinct, Marsden Park Industrial Precinct, Area 20 Precinct, Schofields Precinct and Marsden Park Precinct. The land to which the plan applies will not change.

#### **Definitions**

This clause will remain unchanged.

#### **Consent Authority**

This clause will remain unchanged.

## **Repeal of Other Local Planning Instruments Applying to the Land**

This clause will remain unchanged.

## **Savings Provision Relating to Pending Development Applications**

This clause currently applies to all precincts other than the Riverstone West Precinct. Applying this clause to the Riverstone West Precinct will ensure that any development applications made but not determined before the commencement of the Precinct Plan will be assessed and determined as if the Precinct Plan had not commenced.

## **Application of SEPPs**

A minor change is proposed to this clause to ensure the clause is consistent with the Standard Instrument Local Environmental Plan. This does not change the intent or operation of the clause.

## **Suspension of Covenants**

This clause will remain unchanged.

## **Permitted or Prohibited Development**

### **Land Use Zones**

This clause will include a list of all zones used across the existing Precinct Plans:

- RU6 Transition;
- R2 Low Density Residential;
- R3 Medium Density Residential;
- B1 Neighbourhood Centre;
- B2 Local Centre;
- B4 Mixed Use;
- B5 Business Development;
- B7 Business Park;
- IN1 General Industrial;
- IN2 Light Industrial;
- SP2 Infrastructure;
- RE1 Public Recreation;
- RE2 Private Recreation;
- E2 Environmental Conservation;
- E3 Environmental Management; and
- E4 Environmental Living.

### **Land Use Table**

Some changes to the permissible or prohibited uses within each zone are necessary to establish consistent controls for each land use zone. The proposed Land Use Table is at Appendix 3, with changes to permissible and prohibited land uses highlighted.

The proposed amendments will not change the zoning of the majority of land that is already zoned under the Growth Centres SEPP. The only areas of land proposed be rezoned are some areas of land zoned R2 Low Density Residential in the Schofields Precinct with an existing minimum residential density of 30 dw/ha. The minimum density requirement is not consistent with the zone objectives, so these areas are proposed to be zoned R3 Medium Density Residential. The areas to be rezoned to R3 Medium Density Residential in the Schofields Precinct are indicated in Figure 3. The full land zoning map is at Appendix 4.

### **Unzoned Land**

Minor changes are proposed to this clause to ensure it is consistent with the Standard Instrument Local Environmental Plan. This does not change the intent or operation of the clause.

### **Additional Permitted Uses for Particular Land**

Minor changes are proposed to this clause to ensure it is consistent with the Standard Instrument Local Environmental Plan. This does not change the intent or operation of the clause. The schedule this clause refers to will contain all additional permitted uses that currently apply under the existing Precinct Plans.

### **Subdivision and Demolition**

These clauses will remain unchanged. The notes to these clauses will be amended to be consistent with the Standard Instrument Local Environmental Plan. This does not change the intent or operation of the note.

### **Temporary Use of Land**

The clause will be amended to allow the following land uses in all Precincts in the Blacktown local government area:

- advertising structures; and
- business premises to be used as a sales office.

These temporary uses are currently allowed in the Marsden Park Precinct but not in the other Precincts.

### **Exempt and Complying Development**

The Precinct Plan does not introduce any new controls for exempt and complying development. It instead relies upon the provisions of Schedule 1 of the Growth Centres SEPP and *State Environmental Planning Policy (Exempt and Complying Development Codes) 2008*. This is unchanged from the existing Precinct Plan.

Areas proposed to be rezoned from R2 to R3

Figure 3

### Principal Development Standards

The principal development standards identified in the Precinct Plan will be unchanged and will include:

- minimum subdivision lot size;
- maximum height of buildings;
- minimum lot sizes for residential development;
- maximum floor space ratio; and
- minimum dwelling densities.

### **Minimum Subdivision Lot Size**

The proposed changes to the minimum lot size controls are addressed above.

Further to the changes described above, this clause will consolidate the objectives from the existing six Precinct Plans and map the minimum lot size in the E4 Environmental Living zone in the Schofields Precinct; currently written in the clause as 12,000m<sup>2</sup>.

### **Subdivision Resulting in Lots between 225-300m<sup>2</sup>**

This clause consolidates a similar clause from the existing six Precinct Plans. There is no change to the intent or operation of the clause.

### **Minimum Lot Sizes for Residential Development in Non-residential Zones**

This clause consolidates a similar clause from the Alex Avenue & Riverstone, Area 20, Schofields and Blacktown Precinct Plans. The restriction of the application of the clause to only land which has no minimum lot size identified (which applied to the Marsden Park Precinct) will be removed.

### **Minimum Lot Sizes for Residential Development in Zone R2 Low Density Residential and Zone R3 Medium Density Residential**

The proposed changes to minimum lot size are addressed above.

### **Minimum Lot Sizes for Secondary Dwellings in Zone R2 Low Density Residential and Zone R3 Medium Density Residential**

This clause consolidates a similar clause from the Alex Avenue & Riverstone, Marsden Park Industrial, Area 20, Schofields and Blacktown Precinct Plans. There is no change to the intent or operation of the clause.

### **Exceptions to Minimum Lot Sizes for Dwelling Houses**

This clause consolidates a similar clause from the Alex Avenue & Riverstone, Marsden Park Industrial, Area 20, Schofields and Blacktown Precinct Plans. There is no change to the intent or operation of the clause.

### **Exceptions to Minimum Lot Sizes for Dwelling Houses on other lots in Zone R2 Low Density Residential**

This clause consolidates similar clauses from the Alex Avenue & Riverstone, Marsden Park Industrial, Area 20, Schofields and Blacktown Precinct Plans. There is no change to the intent or operation of the clause.

### **Exceptions to Minimum Lot Sizes for Dwelling Houses on Small Lots**

This clause consolidates a similar clause from the Alex Avenue & Riverstone, Marsden Park Industrial, Area 20, Schofields and Blacktown Precinct Plans. The clause in the Marsden Park Industrial Precinct Plan and the Blacktown Precinct Plan currently applies only to R3 Medium Density Residential zoned land, the proposed clause will apply to R2 Low Density Residential zoned land as well.

### **Minimum Lot Sizes in Split Zones**

This clause consolidates a similar clause from the Alex Avenue & Riverstone, Marsden Park Industrial, Area 20, Schofields and Blacktown Precinct Plans. There is no change to the intent or operation of the clause.

### **Attached Dwellings, Manor Homes and Multi Dwelling Housing in Zone R2 Low Density Residential**

This clause consolidates a similar clause from all Precinct Plans. There is no change to the intent or operation of the clause, however the existing Marsden Park Industrial and Blacktown Precinct Plans did not permit Manor Homes in the R2 Low Density Residential zone if locational criteria were met. Manor homes will now be allowed in all precincts in the R2 Low Density Residential zone if locational criteria are met.

### **Residential Density**

The proposed changes to residential density are addressed above.

### **Dwellings on Riverstone Scheduled Lands**

This clause currently applies to the Riverstone Scheduled Lands only and has been transferred from the Alex Avenue & Riverstone Precinct Plan. There is no change to the intent or operation of the clause.

### **Shops – Maximum Gross Floor Area**

This clause consolidates the existing clauses in the Riverstone West and Marsden Park Industrial Precinct Plans. Inclusion of this clause will not extend its operation as it only applies to B7 Business Park zoned land and these are the only two precincts that contain this zone. The Riverstone West Precinct Plan exempts premises for the retail of office supplies from the 500m<sup>2</sup> cap in a particular development. This exclusion will be retained so that it also applies to the B7 Business Park zoned land in the Marsden Park Industrial Precinct.

### **Height of Buildings**

This clause will consolidate the objectives from the existing six Precinct Plans. No other change is proposed.

### **Floor Space Ratio**

This clause will consolidate the objectives from the existing six Precinct Plans.

Minor changes are proposed to this clause to ensure it is consistent with the Standard Instrument Local Environmental Plan. This does not change the intent or operation of the clause. A subclause restricting light industry floor space in the Riverstone West Precinct in Zone B7 Business Park will be retained.

### **Calculation of Floor Space Ratio and Site Area**

This clause will not be changed.

## **Exceptions to Development Standards**

Minor changes are proposed to this clause to ensure it is consistent with the Standard Instrument Local Environmental Plan. This does not change the intent or operation of the clause.

## **Miscellaneous Provisions**

### **Relevant Acquisition Authority**

A consolidated list of acquisition authorities from all six Precinct Plans will appear in this clause. This clause will not change the existing acquisition liabilities across the six Precinct Plans.

### **Classification and Reclassification of Public Land**

This clause will not be changed.

### **Development Near Zone Boundaries**

This clause consolidates a similar clause from all of the Precinct Plans. The existing Precinct Plans include different distances within which this clause applies. In the Schofields Precinct this clause does not apply to land zoned RE1 Public Recreation. The proposed clause will now apply to so much of the land that is within:

- 50 metres of a boundary between Zone RE1 Public Recreation and any other zone;
- 100 metres of a boundary between Zone SP2 Infrastructure and any other zone;
- 60 metres of a boundary between land zoned B2 Local Centre and land zoned B4 Mixed Use; and
- 30 metres of a boundary between any 2 other zones.

### **Controls Relating to Miscellaneous Permissible Uses**

An error which identified the maximum retail floor area for neighbourhood shops in the Marsden Park Industrial Precinct as 1000m<sup>2</sup> has been rectified; the maximum will now be 100m<sup>2</sup> consistent with all other existing Precinct Plans.

The control for secondary dwellings will be amended to be consistent with the standard instrument and Blacktown Local Environmental Plan 2015. Therefore, the total floor area of a secondary dwelling will be limited to 60m<sup>2</sup> or 5% of the total floor area of the principal dwelling (whichever is the greater).

No other changes will be made to this clause.

### **Architectural Roof Features**

This clause will not be changed.

### **Conversion of Fire Alarms**

This clause will not be changed.

## **Preservation of Trees or Vegetation**

This clause will not be changed.

## **Heritage Conservation**

This clause will not be changed.

This clause does not currently apply to the Marsden Park Industrial Precinct or Area 20 Precinct as no heritage items or areas were identified during the preparation of these Precinct Plans. The inclusion of this clause will not affect the controls in these precincts unless specific sites or items are listed in the schedule to the Precinct Plan in future. The Schedule to this clause will contain a consolidated list of all heritage items across the existing Precinct Plans.

## **Bushfire Hazard Reduction Work**

This clause will not be changed.

## **Infrastructure Development and Use of Existing Buildings of the Crown**

This clause will not be changed.

## **Eco-tourist Facilities**

Currently only applies to the Blacktown and Marsden Park Precinct Plans. The clause will now apply to all eco-tourist facility development.

## **Additional Local Provisions**

### **Public Utility Infrastructure**

This clause will not be changed.

### **Information and Education Facilities on Land in R2 Low Density Residential**

This clause currently applies to every precinct where the R2 Low Density Residential zone occurs except the Area 20 Precinct. It is proposed to retain this clause and therefore allow information and education facilities in the Area 20 Precinct in R2 Low Density Residential zoned land, consistent with every other precinct.

### **Native Vegetation Retention and Riparian Protection Areas**

The title of this clause will be updated to refer to Riparian Protection Areas and the outdated reference to the, now repealed, Part 3A of the Environmental Planning and Assessment Act 1979 will be amended to reference Division 4.1 of Part 4. These minor amendments will not change the intent or operation of the clause.

### **Existing Native Vegetation**

This clause will not be changed.

### **Development of Land within Zone B7 Business Park – Additional Floor Space Ratio**

This clause will not be changed. This clause applies to a specific area in the Riverstone West Precinct so the retention of this clause in the consolidated precinct plan will not extend its application to any additional areas.

### **Educational Establishments, Hotels, Motels, Office Premises and Registered Clubs on Certain Land within Zone IN1 Light Industrial**

This clause will not be changed. This clause applies to a specific mapped area in the Riverstone West Precinct and the retention of this clause in the consolidated precinct plan will not extend its application to any additional areas.

### **Development in Zone E2 Environmental Conservation**

This currently only applies to the Riverstone West, Schofields and Marsden Park Precincts. The inclusion of this clause will extend its operation to E2 Environmental Conservation zoned land in the Riverstone Precinct, Alex Avenue Precinct, Area 20 Precinct and Marsden Park Industrial Precinct and requires the preparation of a vegetation management plan prior to the granting of development consent.

### **Subdivision of Land Adjoining Zone E2 Environmental Conservation**

This clause currently only applies to the Schofields and Marsden Park Precincts. The inclusion of this clause will extend its operation to E2 Environmental Conservation zoned land in the Riverstone West Precinct, Riverstone Precinct, Alex Avenue Precinct, Area 20 Precinct and Marsden Park Industrial Precinct and requires arrangements to be made for the rehabilitation and revegetation of E2 Environmental Conservation zoned land prior to a consent authority granting consent for subdivision.

### **Ground Floor Development in Zone B4 Mixed Use**

This clause currently applies to the Alex Avenue and Riverstone Precincts. The clause requires a certain area within the Alex Avenue Precinct to have an active street frontage. This requirement will be managed by the specific Active Street Frontage clause which is addressed in further detail below.

### **Development in Zone B1 Neighbourhood Centre**

This clause currently only applies to Alex Avenue and Riverstone Precincts. The inclusion of this clause will extend its operation to the Schofields Precinct and require active uses on the ground floor of development within the B1 Neighbourhood Centre zone.

### **Sex Services and Restricted Premises**

This clause currently only applies to the Marsden Park Precinct. It is proposed to extend the operation of these clauses to the other Precincts where sex services and restricted premises are permissible: Riverstone

and Alex Avenue, Riverstone West and Marsden Park Industrial (in each precinct these land uses are permitted with consent in the B7 Business Park, IN1 General Industrial and IN2 Light Industrial zones).

### **Development in Special Area – Schofields Station Area**

This clause will not be changed. This clause applies to a specific area that is mapped on the Special Areas Map so the retention of this clause in the consolidated precinct plan will not extend its application to any additional areas.

### **Development on Riverstone Scheduled Lands**

This clause will not be changed. This clause applies to a mapped area so the retention of this clause in the consolidated precinct plan will not extend its application to any additional areas.

### **Active Street Frontages**

This clause applies to the B2 Local Centre and B4 Mixed Use zone in the Area 20 Precinct and refers to the Active Street Frontages Map that identifies the specific areas to which it applies. This method of identifying active street frontages is consistent with the standard instrument Local Environmental Plan.

A similar clause also currently applies to all B2 Local Centre zoned land in the Schofields and Marsden Park Precincts but is not identified on a map.

To ensure consistency with the standard instrument Local Environmental Plan, the specific areas where active street frontages are required will be mapped for the Schofields and Marsden Park Precincts.

There is not currently an active street frontages clause for the Alex Avenue Precinct, however an existing clause 'Ground Floor Development in zone B4 Mixed Use' (Clause 6.6) requires active uses for the area of B4 Mixed Use zoned land that fronts RE1 Public Recreation zoned land. Clause 6.6 will not be included in the consolidated precinct plan, but the area identified by the existing clause 6.6 will be mapped as an 'active street frontage' under this clause. The B2 Local Centre zoned land will also have active street frontages mapped.

The draft Active Street Frontages map is at Appendix 5, along with more detailed maps of each precinct subject to amendment.

### **Development of Land within or Adjacent to Public Transport Corridor**

This clause will not be changed. It will only apply where there is a transport corridor identified. The area identified as a transport corridor will not change as a result of this amendment.

### **Development on Certain Land Identified as Green and Golden Bell Frog Habitat**

This clause will not be changed and will continue to apply to a specific mapped area within the Riverstone Precinct.

## **Schedules**

### **Schedule 1 Additional Permitted Uses**

This Schedule includes a consolidation of all the additional permitted uses identified in the six current Precinct Plans.

### **Schedule 4 Classification and Reclassification of Public Land**

There is no change to this Schedule.

### **Schedule 5 Environmental heritage**

This Schedule includes a consolidation of all the heritage items identified in the six current Precinct Plans.

## **Dictionary**

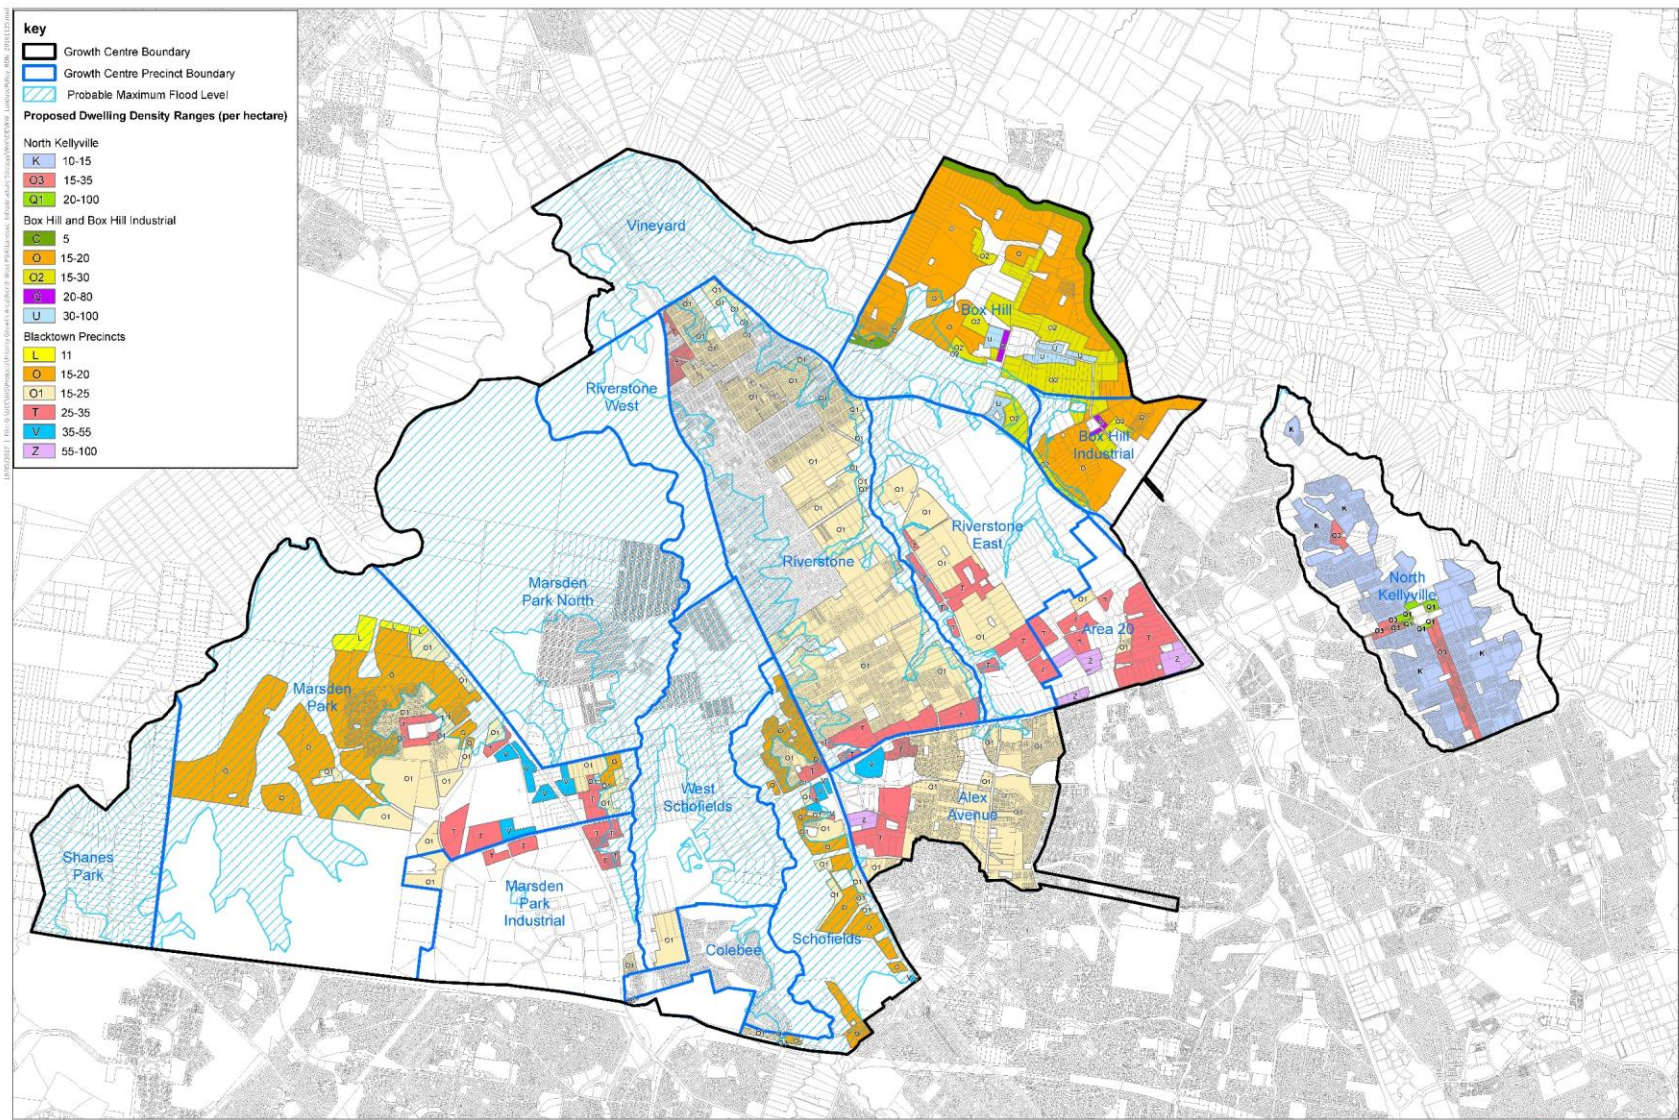

A definition of eco-tourist facilities consistent with the Standard Instrument Local Environmental Plan will be included in the Dictionary. Eco-tourist facilities are a permissible use in certain areas of the Marsden Park Precinct but the Dictionary does not currently include a definition for this land use term.

All definitions will be updated to be consistent with the definitions in the standard instrument local environmental plan. A number of new definitions will be added that have not previously been used in the Growth Centres SEPP so that these uses can be specified in the land use table. These definitions are:

- Camping grounds;
- Heavy industrial storage establishments;
- Industrial training facilities;
- Mooring pens;
- Open cut mining; and
- Wharf or boating facilities.
