

Cabbage Tree Road sand Quarry Community Consultative Committee Annual Report – 2024

Independent Chairperson: John Turner OAM

Proponent contact: Darren Williams – 0429877704

1. Executive summary/introduction:

The Community Consultative Committee (CCC) continues to function well with cross overs of information from the CCC to the company and vice versa.

The company provides good information to the CCC members and has staff, executive members and contractors available to address any queries of the CCC.

Attendance has been good with two exceptions, one a community CCC member who has not attended a meeting this year and the Port Stephens Council nominated member who also has not attending any meetings. A different Port Stephens Council delegate has been appointed following the Local Government elections in September, but that person did not attend the one meeting held since September 2024.

The Terms of Reference and the Code of Conduct requirements were affirmed.

2. CCC activities over the last 12 months.

Number of meetings: four.

Attendance: see above.

Site visits: Nil. The CCC is fully advised of the operations through significant digital and other information.

Review of effectiveness: The CCC is functioning well and is carrying out the role envisaged in the CCC guidelines.

3. Key issues:

There have been no key issues this year.

The company is vigilant in enforcing correct truck movements with virtually no issues arising in that area.

4. Focus for next 12 months.

Regular meetings will continue with an emphasis on cross information between the CCC.

John Turner OAM – Independent Chair, Cabbage Tree Road sand Quarry CCC – 13/2/2025
